DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-7, drawn to a method of treating systemic lupus erythmatosus in a patient in need thereof comprising administering a humanized anti-CD11a antibody, classified in Class 424, subclass 133.1.
- II. Claims 8-14, drawn to a method of treating multiple sclerosis in a patient in need thereof comprising administering a humanized anti-CD11a antibody, classified in Class 424, subclass 133.1.

2. Groups I and II are different methods. Various methods of treating differ with respect to ingredients, method steps, and endpoints; therefore, each method is patentably distinct.

3. These inventions are distinct for the reasons given above. In addition, they have acquired a separate status in the art as shown by different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper. Further, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (571) 272-0845. The examiner can normally be reached Monday through Friday from 7:30 am to 4:00 pm. A message may be left on the examiner's voice mail service. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.
